In what ways can Australia continue to advance its key national and geopolitical interests in Antarctica and the Southern Ocean region?

**Antarctica’s 2040 Vision**

The problem with co-ordinating good policy in Antarctica is that public awareness of the Antarctic Treaty System is low. Those who have visited Antarctica personally are strong supporters of the research occurring on, or under, the ice. However, the research is conducted in accordance with the principle of international law that Antarctica is a special place set aside for the purposes of peace and science. We propose rolling out an education program across the country to build awareness of Antarctica issues through the school curriculum, and to further reinforce Australia’s sovereignty claim.

We propose an education program across the country to build awareness of Antarctica issues through the school curriculum, and to further reinforce Australia’s sovereignty claim. A scholarship for a week-long exchange in Antarctica for the top students in each state will be established. The proposal would also be of minimal cost. The problem with co-ordinating good policy in Antarctica is that public awareness of the treaty system and much of the research occurring on, or under, the ice is low. **Establishment of the Antarctic Joint Effort and Funding Association**

This policy proposal was developed by the Purple Team of the Futures Thinking workshop, delivered during the Institute for Regional Security’s Future Strategic Leaders’ Congress on Antarctica and the Southern Ocean in June 2019.

**Australian 2040 Vision**

A 2040 vision that fosters international cooperation and increases Australia’s engagement on issues relating to the Antarctic and Southern Ocean region. Australia will hold a position of authority within the region and make a deliberate effort to safeguard the Antarctic treaty system, and the environmental and political stability of the region.

**Establishment of the Australian Antarctica and Southern Ocean Authority**

This policy proposal was developed by the Purple Team of the Futures Thinking workshop, delivered during the Institute for Regional Security’s Future Strategic Leaders’ Congress on Antarctica and the Southern Ocean in June 2019.

**Australian 2040 Vision**

Achieving a 2040 future where there are key technological advancements in the Antarctic and Southern Ocean region, which result in an influx of tourism and research findings, the most prominent of which is the discovery of the millions of ice cores. With this increased interest in the region and the acknowledgement of the Madrid protocol coming to an end in 2040, Australia should welcome the establishment of the Antarctic Joint Effort and Funding Agreement (AJEFA).
